-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-16 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Craig (USP 6,153,431).

Craig teaches a method and apparatus for beverage analysis using a test device/strip that contacts the beverage. The taught test strip is held by the users fingers and has been read on the claimed “positioned on at least one finger of the user”. Column 15 lines 11+ teach application of a polymer over the test strip which, in the absence of better defining what is intended by “nail polish”, has been read on the claimed nail polish. Figure 25 and column 18 lines 55+ teach several different test strip devices that have capability of being held simultaneously between multiple fingers and has been read on the claimed placement of a “... plurality of different fingers ...”. In the absence of better defining what structure is intended by the claimed “decal”, the Office has read the claimed decal on the taught test strip which is positioned on the finger when in use and indistinguishable from the instant claims.

If Applicants' were to specify in the independent claims that the chemically reactive substance is – coated on at least one finger nail --, it appears the art of record would be overcome.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Bohn et al. teach a nail polish that contains a reagent to indicate psoriasis.

Bibi et al. teach a nail polish that contains a UV indicator.
